Saltram Data is pleased to welcome Mark Hegarty and Todd Pritchard as our new systems field engineers. Also Katrina is very happy to welcome Jessica Ponce as our new receptionist.

Many of you will recognise Mark and Todd from their previous positions at Minfos and Toshiba Tec. We are looking forward to providing an even greater level of software and hardware experience and expertise for our valued Clients in 2008.

Minfos Clients - All Minfos Clients should have received a letter November 2007 in regards to changing operating system platforms from *Novell to Microsoft*. We understand this has created a certain amount of confusion as to what the Pharmacies are required to do. If you have any concerns or questions, Saltram will be able to assist with explaining the requirements for the change over.

Changes for Integrated Eftpos Users - Integrated Eftpos has been available for Minfos users for some time, however, with the new emerging Smart Card technology, the current equipment is not compatible. A new terminal has been released called the 5110 which is Smart Card capable. Currently most banks will retain the existing equipment, (PX328 and NPT710), however Comm Bank are ready to roll out the new 5110 terminals. These new pin pads should only be installed by experienced technicians. Please call us for more information.

NCR Registers POS Point of Sale - We are now Marketing *NCR All in One Registers*, NCR is one of the largest Point of Sale (POS) manufacturers. Special pricing has been made available to Saltram that we are now passing onto our customers. They are compact reliable purpose built for Retail. At the present time we can supply these units for the same price as a PC based Till.

For assistance with any of these matters **Call Saltram on 1300 307 108** and we will be more than happy to be of service to you. Free onsite appraisals (no obligation) of your current hardware are always available.

Consumables -.Remember that Saltram Data is now supplying all consumables, e.g. Toners Cartridges, Till Rolls.
