As you maybe aware Minfos recommend having a high Quality **Surge Protector** in between the UPS and the direct mains power Plug. This will extend the life of your UPS. And in the event of .The **Surge Protector** failing the manufacturer offers a \$100,000 warranty on the damaged items. Please at least have one of these on your Novell Server and don't forget home as well, the **Surge Protector** is also perfect for your Home Theater or Home PC.

Fill in and Return to Fax: 07 3355 7577
